REMAXX MOUNTING AGENTS AND ACCESSORIES  
 High performance mounting assistance for optimal  
 and careful assembly flows

## REMAXX MOUNTING AGENTS AND ACCESSORIES

REMA TIP TOP can offer a complete portfolio of mounting agents and accessories especially developed for the most diverse ranges of applications:

### REMAXX UNIVERSAL

The mounting paste for universal use

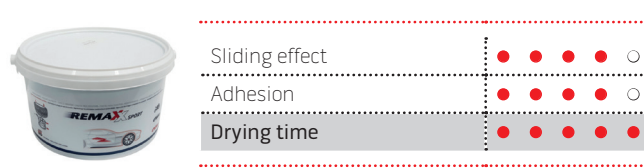

- Best all-round characteristics
- Suitable for all standard tire/rim combinations
- Non-spattering

### REMAXX SPORT

The power package for sport tires

- Mounting paste perfectly suitable for wide tires
- Good initial sliding effect reduces seating pressure
- Non-spattering, powerful and fast-drying

### REMAXX MONTSEAL

The specialist for retreading and the mounting of used tires

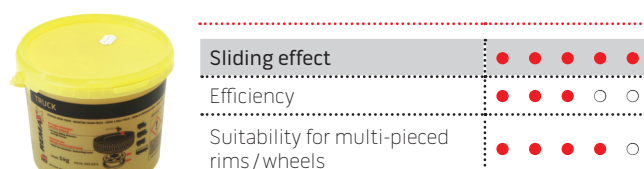

- 2 in 1: mounting paste and bead sealer
- Perfect aid for used tires and old rims
- Easy to apply in one operation

### REMAXX TRUCK

Oldie but goldie

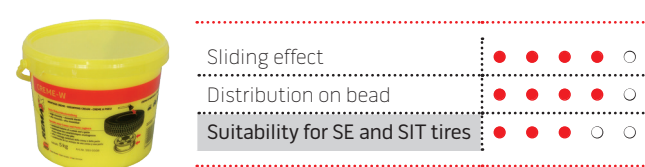

- Mounting paste especially developed for long sliding distances with high friction between tires and rims
- Effective sliding coat
- Low in consumption

### REMAXX CREME-W

The expert for large tires

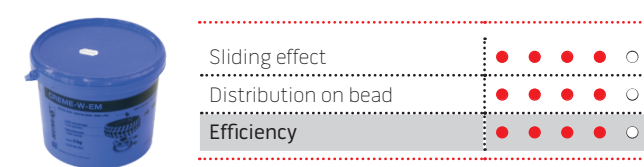

- Mounting creme with soft texture (but brushes will not sink in) and stable viscosity
- Ensures the turn-up effect when mounting SE tires
- Easy to apply to large tires

### REMAXX CREME-W EM

The number one for EM/OTR tires

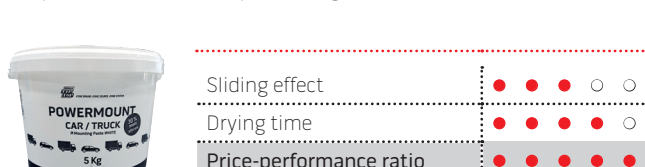

- Mounting creme to be used for extreme conditions
- Easy to apply to large tires
- Stable viscosity combined with creamy texture (but brushes will not sink in)

### POWERMOUNT

The economical choice for standard applications

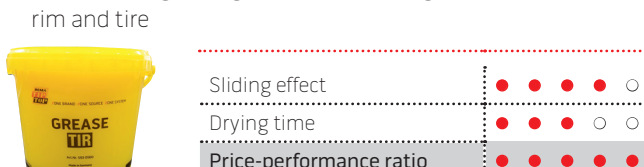

- Low in consumption
- Particularly economical when purchased in large batches
- Spin resistant and rapid drying

### GREASE TIR

The price miracle for large tires

- Spin resistant wax
- Excellent cost-performance ratio
- Paste for long sliding distances with high friction between rim and tire

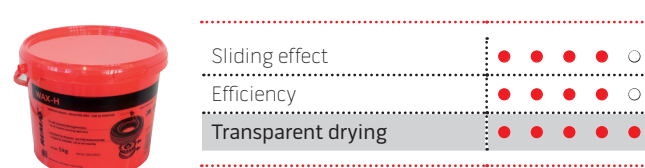

## REMAXX MOUNTING AGENTS AND ACCESSORIES

### REMAXX WAX-H

Leaves no traces

- Non-spattering, firm wax – dries without leaving visible residues
- Suitable for all standard mounting applications on two-wheel vehicle and car tires

### REMAXX MONT 2000

The competitive alternative for standard applications

- Mounting paste with high viscosity
- Great value for money
- Low in consumption

### REMAXX FLUID

The right choice for mounting tires with TPMS sensors

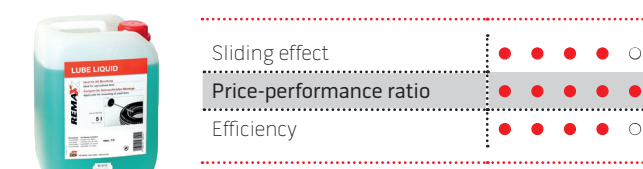

- Sprayable solution, especially suited for clean mounting of modern wheel systems
- Economic in use
- Reduces the risk of potentially blocking sensors

### REMAXX LUBE LIQUID

The ace for agricultural tires

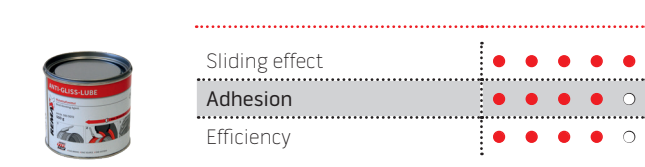

- Liquid lubricant
- Especially developed for agricultural tires
- Extremely economical

### REMAXX ANTI GLISS LUBE

The expert for large-size agricultural tires

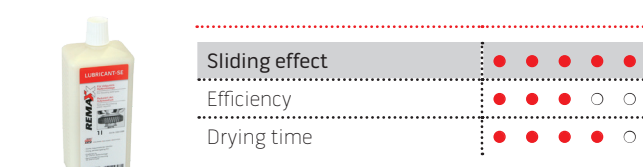

- Bead bonding agent on resin base
- Prevents the tire from slipping on the rim
- Durably elastic after drying

### REMAXX LUBRICANT SE

The masterpiece for mounting solid rubber tires

- Liquid lubricant ideal for SE- and SIT-tires
- Effective, long-lasting gliding film
- Reduces the pressure required to mount the tire

## REMAXX MOUNTING AGENTS AND ACCESSORIES

### ACCESSORIES

#### REMAXX DEMONTAGE-FLUID

Fluid with excellent flow properties for demounting tires which are stuck on their rims

- Forms a low friction sliding coat between the bead and the rim
- Fluid can easily be wiped off tire after demounting
- Demounted tire stays completely serviceable
- Free from mineral oil (no reaction with the rubber structure of the beads)

**⚠ Caution:** Because of its high lubricating effect, REMAXX Demounting-Fluid must not be used for mounting purposes since the tire may slip off the rim when rolling!

#### REMAXX BEAD SEALER

Spreadable sealant for sealing leaks caused by ageing or wear on the beads

- Applied to the bead and bead seat before inflating the tire
- During inflation the solid matter contained in the solution is pressed into the uneven areas and seals them

**⚠ Caution:** As REMAXX BEAD SEALER is flammable, do not use it to fill tires. Furthermore, do not use it to seal larger bead injuries caused during tire mounting or cuts extending to the fabric.

#### Tire COMPOUND

Stiff paste with stable viscosity to seal the gap between tire bead and rim edge

- Can be used as a "flexible pump ring"
- Suitable for all tire mounting operations
- Facilitates tire inflation

#### SPECIAL BRUSHES

For the application of mounting lubricants

- Flat brushes are especially suitable for mounting low-profile tires
- Brushes with round head are excellent for the application of mounting creams

#### TALC

For mounting tube tires

- Incl. dosing aid
- Fine-grained
- Asbestos free
